

## Foundations Package Manager (FOU PM)

Location: Athens/Europe/Flexible

DF Group invests, develops, manages and operates RES Projects of all technologies and has been growing its team in all sectors. Through its international team of experts, DF Group develops offshore wind projects and assesses emerging offshore wind markets worldwide as well as opportunities in mature markets.

We are looking for a Foundation Package Manager (FOU PM) to join our fast-growing offshore renewables team. The FOU PM will be a key member of the core technical and development team and will assume a range of duties from the very initial site screening stage through to development and construction of national and international offshore renewables projects.

Reporting to the Technical Director at a corporate level, the FOU PM will be responsible for the management and execution of all foundation deliverables required throughout the project lifecycle working in close collaboration with other packages. In particular, the role will require a thorough understanding of foundation type selection including fixed and floating types, producing scope of works for third parties, managing internal resources and external work streams.

### *Experience Required*

- Ideally senior level with proven experience in offshore renewables
- Lead package works and collaborating with other packages and Project Management to deliver satisfactory results within the project time schedule and budget
- Previous experience as a member of Foundations package teams in development or construction stage of offshore wind projects with thorough understanding of both theoretical and practical elements of foundations design, fabrication and installation
- Involved in conducting or managing foundation selection studies
- Expert on recognising the boundaries of fixed foundation types (including jackets, XXL monopiles), up-to date with new technology types and working knowledge of floating foundations type
- Produced specifications and scope of works for foundation concept designs
- Risk identification and management of foundation work streams
- Management of EPC contracts
- Ability to create time schedules, CAPEX and OPEX estimates for the Foundation Package
- Experience in Change Management and ability to cooperate with the Commercial team
- Reporting and liaison with stakeholders both at corporate and stakeholder level
- Involved in procurement and commercial processes of small and large contracts

### *Soft Skills*

- Team player with ability to comprehend and react to team dynamics
- Good presentation skills
- Confidence in individual skills
- Sense of accountability
- Ability to lead by example and mentor senior and junior resources

- Negotiation skills
- Reporting
- Internal and external stakeholder management

*Qualifications*

- Master's degree or equivalent in civil, structural or mechanical engineering or closely related
- Project Management certification will be considered favourably
- Chartered Member of Technical Chamber of Greece or an international institution desired but not essential
- Written and spoken fluency in English
