

## Geotechnical Engineer / Project Engineer

Location: Athens/Europe/Flexible

DF Group invests, develops, manages and operates RES Projects of all technologies and has been growing its team in all sectors. Through its international team of experts, DF Group develops offshore wind projects and assesses emerging offshore wind markets worldwide as well as opportunities in mature markets.

We are looking for a Geotechnical Engineer to join our fast-growing offshore renewables team. The Geotechnical Engineer will be a key member of the core engineering and development team and will assume a range of duties from the very initial site screening stage through to development and construction of national and international offshore renewables projects.

Reporting to the Technical Director at a corporate level, the Geotechnical Engineer will be responsible for the management and execution of all engineering deliverables required throughout the project lifecycle working in close collaboration with Foundations team. In particular, the role will require a thorough understanding of assessing soil geotechnical properties, identification of risks, working alongside the procurement team for specification of engineering consultancy studies and surveys, management of third parties and a lot more.

### *Experience Required*

- Ideally mid-senior to senior level with proven experience in offshore renewables
- Involved in conducting or managing geotechnical site characterisation desktop studies of large offshore fields
- Developed Site Investigation (SI) strategies, produced specifications and scope of works for SI campaigns
- Interpretation of geo data into foundations design parameters and management of geotechnical design disciplines
- Development and/ or execution of fixed foundations projects with particular focus on monopiles and pre/ post piled jackets and/ or floating wind projects
- Risk identification and management of geotechnical work streams
- Exposure in 3D ground modelling
- Reporting and liaison with stakeholders both at corporate and stakeholder level
- Involved in procurement and commercial processes of small and large contracts

### *Soft Skills*

- Team player with ability to comprehend and react to team dynamics
- Good presentation skills
- Confidence in individual skills
- Sense of accountability

### *Qualifications*

- Education level equivalent to MEng Level from a civil/ structural discipline
- Chartered Member of Technical Chamber of Greece or an international institution desired but not essential
- Written and spoken fluency in English
